# FINAL REPORT OF THE STATE LEVEL EXPERT COMMITTEE

## 1. SUMMARY

1.1 In response to the directions of the Hon'ble Supreme Court's Order dated 12.12.96, the Government of Goa on 24.01.97 constituted an Expert Committee, under the chairmanship of Shri Sadanand M. Sawant, for identification of forests in the State.

1.2 The Committee identified forests as given below:-

Government Forest Lands	= 1223.73 sq. km.
Forest on Lands other than 'Government Forest Lands' (including revenue lands)	= <u>48.67 sq. km.</u>
Total	1272.40 sq. km.

1.3 These Government Forest Lands as identified by the Committee also include areas to the extent of 13.08 sq. km. which have been cleared and / or diverted for mining and various developmental projects since 1980.

1.4 In addition Committee as mandated by the terms of reference vide para 5 of the order identified areas covered by plantations belonging to Government and also those belonging to private persons as below:-

Area covered by plantations trees belonging to Government

On Government Forest Lands	= 279.75 sq. km.
On Revenue Lands	= 22.97 sq. km.
On Comunidade Land	= 48.35 sq. km.
Area covered by plantations trees belonging to private persons	= 791.22 sq. km.

## 2. INTRODUCTION:

2.1. As per the Hon'ble Supreme Court direction dated 12.12.1996 in writ **Petition (Civil) No. 202 of 1995 TN Godvarman Thirumulpad V/S Union of India** all the States of India were asked to set up a committee to look into the **terms of reference** vide para 5 of the order. These were:

- (A) Identify areas which are "Forests" irrespective of whether they are so notified. Recognized or classified under any law, and irrespective of the ownership of the land of such forest;
- (B) Identify areas which were earlier forests but stand degraded, denuded, or cleared; and
- (C) Identify areas covered by plantation trees belonging to Government and those belonging to private persons.

### **3. CONSTITUTION OF THE COMMITTEE:**

**3.1.** Consequent to the Hon' ble Supreme Court's order, the Government of Goa issued a notification No. 8-12-96/FOR(REV)(PART)/ dated 24.01.1997, Annexure – I forming a committee. The members of the committee were:

- |     |  |                  |
|-----|--|------------------|
| (1) | Shri S.M. Sawant                             | Chairman         |
| (2) | Dr. A. Untawale, N.I.O                       | Member           |
| (3) | Shri Jagdish Wagh                            | Member           |
| (4) | Conservator of Forests                       | Member           |
| (5) | Dy. Conservator of Forests<br>(North Goa)    | Member           |
| (6) | Dy. Conservator of Forests<br>(South Goa)    | Member           |
| (7) | Dy. Conservator of Forests<br>(Working Plan) | Member Secretary |

#### 4. GUIDELINES LAID DOWN BY THE COMMITTEE:

**(A) To identify areas which are ‘Forest’ irrespective of whether they are so notified, recognized or classified under any law, and irrespective of the ownership of the land of such forest;**

4.1 For the purpose of identification of forests two broad categories were made.

**(a) Government Forests Lands:** which shall include all forests recorded by the State Forest Department as Government Forest lands; and shall also include **disputed Forest Lands** i.e. Government forest which may or may not have been included in the Working Plan records of Forest Department but which are in ownership dispute in various courts of law. (Annexure IVA & IVB)

**(b) Forest on lands other than “Government Forest lands” as in (a) above** shall be identified as “Forests” based on the following criteria.

- (i) 75% of the crop composition of such lands should be of forest species, and
- (ii) The area should be either contiguous to Government forest lands or if in isolation the minimum area so identified should be 5 ha. **In case of Mangroves areas less than 5 ha also shall be considered as forests whether or not in contiguity to Government Forest lands, and**

**(B) To identify areas which were earlier forests but stand degraded denuded, or cleared:-**

4.2. It is seen that no specific cut off period has been given for comparing the degradation, denudation or clearing on the lands to be so identified. Committee

therefore decided 1980 to be the bench mark for Government Forest lands. For identifying such areas outside the Government forest lands, however, the committee could not find any previous status/records which could serve as a suitable standard for comparison. However in Writ Petition No. 273 of 1997 the Hon'ble High Court of Bombay at Goa directed the Committee to submit a report over an area of 1.13 Ha. survey No. 69/4 of Penha de Franca village. Accordingly the committee inspected the site and submitted the report to the Hon'ble High Court. On the basis of observations and scientific data collected, analysed and interpreted, the committee concluded that the survey No. 69/4 was "Forest".

**(C) To identify areas covered by plantation trees belonging to Government and those belonging to private persons**

**4.3.** Areas under miscellaneous horticultural crops like cashew, arecanut and coconut etc., commercial plantations of rubber and timber species like teak raised by individuals, companies and Government Departments were considered under this category by the committee.

## 5. DOCUMENTS RELIED UPON BY THE COMMITTEE.

5.1. For the purpose of carrying out this exercise the following documents were utilized by the committee.

- (1) Green cover map of Goa based on **Satellite Imageries** of 50, 000 Scale prepared by the Department of Science Technology and Environment, Govt. of Goa based on **Satellite Imageries** [ 1: 50,000 Scale of year 1991-93].
- (2) **Topo sheets** of the year 1965 obtained from the Survey of India.
- (3) **Village maps** prepared by the Directorate of Settlement and Land Records Department, Govt. of Goa.
- (4) **The revenue records** of ownership by survey numbers i.e. Form I and XIV, obtained from the Revenue Department, Govt. of Goa.
- (5) **Regional Plan** of Town and Country Planning Department, Govt. of Goa.
- (6) Statistics on plantation etc. obtained from Forest Department and Statistics and Planning Department of Govt. of Goa.
- (7) **State of Forest Report 1997** prepared by Forest Survey of India.
- (8) Government Forests Maps from State Forest Department

## 6. ACTION TAKEN BY THE COMMITTEE:

### **(A) To Identify areas which are “Forest” irrespective of whether they are so notified, recognized or classified under any law, and irrespective of the ownership of the land of such forest;**

- 6.1. Lack of any meaningful and conclusive data on Private forests either with revenue or Forest Department made it imperative for the Committee to initiate a fresh identification of such lands within the meaning of Supreme Court order dated 12-12-96. The Green cover map based on satellite imageries of 91-93 was procured from Department of Science and Technology. It was superimposed on the Government Forest Map (Working Plan map) to distinguish and demarcate green cover on 'lands other than Government Forest lands'. The demarcated map was then superimposed on toposheets from Survey of India to prepare base Maps.
- 6.2 These base Maps were given to the forest staff to visit the sites and report the areas which met the criteria set up by the committee to identify the 'forests'<sup>1</sup>. The Range Office staff visited the sites and identified the areas.
- 6.3. The Revenue authorities were also asked to identify the forests on revenue lands and report these to the Committee.
- 6.4. In addition, a notice was published in the local newspapers (Annexure II) to give wide publicity and scope for the identification of these forests by local people.
- 6.5. The areas thus reported to the committee were randomly selected for site visits by the committee and inspected by committee members. In all, forests of 97 villages were inspected by the committee members. Directions were issued to the Dy. Conservator of Forests, to inspect and verify the sites which could not be visited by the other committee members. The committee had 14 field visits (**Annexure X B**) and held 19 meetings (**Annexure X A**).
- 6.6. In interim report was submitted to the Supreme Court after the first round of field exercise. This report was submitted while the identification of 'forests' was still in progress and in this report 30.2475 sq. km. of private forests were reported. Subsequent to this report, additional areas were identified by the committee and all

these areas were then re-inspected by the field staff and, wherever possible, necessary corrections were done after verifying with the survey nos. in the revenue records.

**6.7.** At the end of above exercise, committee identified 1272.40 sq. km. Forests which included 1223.73 sq. km. of Government Forest lands (**Annexure III**) and 48.67 sq. km. of forest on lands other than Govt. Forest Lands. The break up of 48.67 sq. km. is as below. (**Annexure V, VI & VII A & VII B**).

- On revenue lands----- 0.80 sq. km
- On lands other than revenue  
& Govt. Forest Lands----- 46.60 sq. km
- Mangrove areas ----- 1.27 sq. km.

**Total 48.65 sq. km.**

A map indicating the villages where the Government forests and villages in which the Forests on lands other than Government forests are located is enclosed as Annexure XII.

**(B). Identify areas which were earlier forests but stand degraded, denuded, or cleared;**

**6.8.** The committee obtained the data on clearings and diversions made on Government Forest lands for the purpose of mining and other development works, from 1980, from the Government records. A list of such areas (13.0798 sq. km.) is included in the annexure (**Annexure VIII A and VIII B**). The break up of 13.08 sq. km. is as below.

1. Irrigation ..... 0.1210 sq. km.
2. Transmission lines ..... 1.3587 sq. km.
3. Konkan railway ..... 0.3670 sq. km.
4. P.W.D. .... 1.1250 sq. km.
5. Mining ..... 11.1081 sq. km.

**6.9.** The area diverted for mining has been worked on the basis of forest areas which form part of various leases renewed under Forest Conservation Act, 1980 for a period of 10 to 20 years. Out of 11.1081 sq. km. renewed, actual diversion shall be only 5.6381 sq. km. and the balance area of 5.47 sq. km. is meant for buffer zone. **(Annexure VIII A).**

**6.10.** The committee had earlier reported an area of 10.6 sq. km as total diverted area in the Interim Report which stands updated.

**C. To Identify areas covered by plantation trees belonging to the Government and those belonging to private persons.**

**6.11.** Data on monocultures and plantations of miscellaneous tree crop belonging to Government and private persons raised on Government Forests, other Government lands and comunidad lands was collected and compiled. These included data on miscellaneous horticulture crops like cashew, arecanut and coconut, commercial plantations of rubber and timber species like Teak raised by individuals, companies and Government Departments.

**6.12.** Committee obtained data on plantations raised by private persons/ companies on lands other than Government Forests and Revenue Lands from Director of Planning and Statistics **(Annexure IX C)** while the data on plantations done on Government forests, revenue lands and comunidad lands was obtained from the State Forest Department.

**6.13.** The committee has, thus, identified 279.75 sq. km. of plantations belonging to Government on 'Government Forest Lands' up to 1998. **(Annexure IX A)**. Taking into account an area of 19.11 sq. km as overlapping area, the actual area coverage under plantation is 260.64 sq. km. Earlier the committee had reported 235.22 sq. km. under this category based on State Forestry Action Plan Document, 1996.

**6.14.** Based on data obtained from Forest Department, the committee has also identified 48.35 sq. km. of plantations belonging to Government on comunidad lands. **(Annexure IX B).**

**6.15.** In addition to above the committee identified 791.22 sq. km. of plantations belonging to private persons in all the 11 Talukas on lands other than Government Forest Lands (**Annexure IX C**). This committee had earlier reported a green cover of 337.086 sq. km. in 8 Taluka of Goa on lands other than the Government Forest lands.

## **7. LIMITATIONS OF THE REPORT AND RECOMMENDATIONS OF THE COMMITTEE**

**7.1.** The method selected by the committee for identification of private forests was ground truthing of the areas marked on base maps generated from toposheet and satellite imageries.

**7.2.** The task was laborious and time consuming and no additional infrastructure and manpower was provided for this. This task was therefore assigned to the existing staff of Forest Department as an additional duty. Due to this reason the task could not be completed within the time frame contemplated by the Committee.

**7.3.** Frequent transfers of forest personnel included in the committee also added to delay in completion of the final report.

**7.4.** Whereas the committee identified Government Forest lands based on working plan and other records of Forest Department, the forests on other lands were identified by field visits and ground truthing of maps based on satellite imageries. The areas included are therefore based on approximation and an exhaustive survey is required to find their actual extent. The areas of such forests identified are therefore subject to correction after the survey. A project submitted by Forest Department to survey and demarcate these areas at a cost of 27.70 lakhs (Annexure XI) has been approved by the State Government but has not been taken up so far as required funds were not made available to Department. The committee recommends that State Government may take all necessary measures to delimit and demarcate there 'Forests'.

- 7.5.** The committee recommends that a survey of these areas should be followed by mutating the land records to reflect the classification of these lands as “Forests” in Form I & XIV of Revenue records.
- 7.6.** It is recommended that these lands are notified by State Government as “Forests” in the Gazette. Pending the notification, the State Government may circulate a list of these forests to all the Government Departments with directions not to divert these lands for any non forestry purpose.
- 7.7.** The possibility of interpretation error, coupled with other limitations like low resolution of the imageries used, cannot be overlooked. Although the field staff has included all possible lands based on local knowledge also, but undulating and hilly terrain might have prevented some remote and secluded lands from identification and inclusion in the report. Committee therefore feels that applicability of Forest Conservation Act on lands, other than those reported by th committee, shall not be limited by this report and committee further recommends that State Government may notify any additional lands identified in future as ‘forests’ within the meaning of Supreme Court order dated 12.12.96.

ANNEXURE XI

SURVEY,  
COMPUTATION AND  
MAPPING OF THE  
PRIVATE FOREST  
AREAS

**PROJECT  
REPORT**

## 2. COMPUTATION AND DIGITIZATION

For speedy and smooth computation and digitization of data and maps there is a need for upgradation of the present GIS system from Arcad (DOS based) to Arcinfo (Window based)/Arcad (Window based) Survey and Demarcation mangrove areas would require a dingy and a boat will be taken on hire basic, Imageries and digital data would be required from NRSA

### TOTAL FINANCIAL REQUIREMENTS

#### 1. MANPOWER REQUIREMENTS

i) Forest Surveyors- TA/DA claims during the months they do the field work.	Rs. 25,000.00
ii). Chief Forest Surveyor/Dy. Conservator of Forests, TA/DA claims	Rs. 5,000.00
iii) Trained Personnel engaged on daily wages	Rs. 2,00,000.00
iv) Labourers engaged on daily wages	Rs. 6,00,000.00
<b>TOTAL</b>	<b>Rs. 8,30,000.00</b>

#### 2. INFRASTRUCTURE REQUIREMENTS

i) Tatamobile	Rs. 3,50,000.00
Maintenance and fuel costs	Rs. 1,50,000.00
ii) Motocycles (4)	Rs.1, 60,000.00
Maintenance and fuel costs	Rs. 50,000.00
iii) Upgradation of GIS Software and Scanner	Rs. 5,00,000.00
iv) Survey Instruments/Drawing instruments & stationery etc.	Rs.1,00,000.00
v) Camping & personal equipments	Rs. 50,000.00
vi) Hire charges of boat	Rs. 50,000.00
vii) Cost of dinghy with out board motor/ petrol/kerosene, life jackets including fuel & maintenance	Rs.1,00,000.00
viii) Walkie talkies	Rs. 50,000.00
imageries/digital data from NRSA	Rs. 1,00,000.00
ix) Provision for A/C 1 <sup>1/2</sup> tonne with stabilizer in computer from of GIS	Rs. 50,000.00
x) Vaccum cleaner	Rs. 5,000.00
xi) Storage cabinet	Rs.20,000.00
xii) UPS	Rs.1,50,000.00
xiii) Office furniture	Rs.40,000.00
xiv) Misl. And unforeseen items	Rs.15,000.00
<b>TOTAL</b>	<b>Rs. 19,40,000.00</b>

**GRAND TOTAL Rs. 27,70,000/- (Rupees twenty seven lakhs and seventy thousand only)**

## PERIOD

As survey of such forests identified can only be taken up from the months of October to March. It will take at least to Working Seasons to complete the field work and also time would be required to plot these on the maps. Therefore, the above project is proposed to take at least 2 years i.e. 1998-1999 to 1999-2000.

The survey and boundary clearance work will be taken up from October to March. There will be seven parties working headed by a trained person (engaged on daily wage basis) supervised by the Forest Surveyors, these will work at seven different sites/villages. At an average each party would clear and survey about 7 running kilometers of boundary every month.

Therefore, at the end of one working season approximately 294 km of boundary would be cleared and surveyed, simultaneously computation and plotting of such areas on the village map would be taken up (1:4000 or 1:10,000 scale) and subsequently on the State map. This group would work throughout the year to achieve the desired targets.

### MANPOWER REQUIREMENTS

#### 1. FOR FIELD WORK

i) Chief Forest Surveyor -----	1
ii) Forest Surveyor -----	3
iii) Trained Personnel -----	7
iv) Labourers -----	35

#### 2. FOR COMPUTATION AND DIGITIZATION

i) Chief Forest Surveyor -----	1
ii) Forest Surveyor -----	1
iii) Trained Personnel -----	2

### INFRASTRUCTURAL REQUIREMENTS

#### 1. TRANSPORTATION

For co-ordination of movements of the working groups from one village to another along with the camping material and equipments a Tatamobile would be required. The co-ordination and inspections of these groups would be done by the Surveyors and Forest rangers who would require independent transport.

Therefore, four motorcycles would be required.

1. Tatamobile (Dual Cabin) ----- 1
2. Motorcycle (100cc) ----- 4

## SURVEY, COMPUTATION AND MAPPING OF THE PRIVATE FOREST AREAS

### **BRIEF HISTORY**

State Level Expert Committee was set up in pursuance of the directive contained in the order of the Hon'ble Supreme Court dated 12.12.1996 vide Government of Goa Notification No. 8-12-96/FOR(REV) (PER) A dated 21.01.1997. The Committee was assigned the following tasks:

1. Identify areas which are "Forest" irrespective of whether they are so notified recognized or classified under any law, and irrespective of the ownership of the land of such forest,
2. Identify areas which were earlier forests but stand degraded, denuded or cleared, and
3. Identify areas covered by plantation trees belonging to the Government and those belonging to private persons.

In this regard the Committee has submitted two interim reports. The territorial divisions were assigned the task of identifying forests in private areas. By the latest compilation of data in the office of the Working Plan Division, approximately 42 sq. km. of private forest had been identified. But during the process of identification a problem arose, identification of survey numbers of the village where the forest existed and also there were cases where only a part of the survey number could be identified as forest. The committee decided on the following criterion to identify forests. These are:

1. 75% of its composition should be forestry species.
2. The area should be contiguous to Government Forest and if in isolation the minimum area should be 5 hac.
3. The canopy density should not be less than 0.4.

In light of the above, it was felt that if the Government has to do proper computation of such forests which have been identified. A survey of such areas is required where only a part of the survey number constitutes a forest. As this would put an additional work burden on the existing staff of Working Plan Division, a project report is submitted to the Government for grant of additional funds which would be required to do this exercise as with the present staff and infrastructure it would be extremely difficult to survey such areas.

### **WORKS TO BE TAKEN UP**

1. Survey and boundary clearance of 1mt. width where part of the survey number has to be identified as 'Forest' and its plotting/computation of area.
2. Tracing of areas identified as forests on village maps and its digitization and subsequent final transfer on the map of Goa on preferably 1:25000 scale.
